NON-FINAL ACTION

1. The applicant's Preliminary Amendment filed 15 JUL 03 has been entered. Following the entry of the Preliminary Amendment, **Claim(s) 26-38** is/are pending.

SEQUENCE RULES

2. This application complies with the sequence rules and the sequences have been entered by the Scientific and Technical Information Center.

35 USC § 112- 2nd Paragraph

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

CLAIM REJECTIONS under 35 USC § 112- 2ND PARAGRAPH

4. **Claim(s) 36-38** is/are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 36 is indefinite because the phrase "wherein said adapter molecule comprises one or more magnifying tags as claimed in Claim 26" lacks proper antecedent basis. Claim 26 is drawn to a method of sequencing all or part of a target nucleic acid molecule and does not mention "magnifying tags." Please clarify.

35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that may form the basis for rejections set forth in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

or

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

CLAIM REJECTIONS UNDER 35 USC § 102

7. **Claim(s) 26-29 and 35** is/are rejected under 35 U.S.C. 102(b) as being anticipated by Keith et al. [US 4,883,761 (1989)].

Keith et al. teach a method of sequencing all or part of a target nucleic acid molecule comprising all of the limitations recited in Claims 26-29 and 35. See at least for example Figure 5a- 5d and the description of Figure 5 in Column 2.

Art Unit: 1634

CLAIM OBJECTIONS

8. **Claim(s) 30-34** is/are objected to because they are dependent upon a rejected independent base claim.

CONCLUSION

9. **Claim(s) 26-38** is/are rejected and/or objected to for the reason(s) set forth above.
